Warranty and maintenance service

Draytek router management and support charge

For an additional monthly fee of £4.50 we will provide the management and support for your DrayTek router until it is discontinued and at End of Life.

If you do not subscribe to this service, you will still benefit from the standard DrayTek 2-year return to base warranty, but we take no responsibility for the maintenance and support of the router.*

The key features of this include:

Maintenance** – we will fully support the router and in the event that the router is deemed faulty we will replace it free of charge including next day delivery and setup costs.

Security – firmware updates often include security patches that address known vulnerabilities and protect against potential cyber threats. By staying up to date, you can safeguard your network and sensitive information from unauthorised access and malicious activities. The latest security patches are applied remotely as they are released via the DrayTek ACS dashboard.

Backups – we regularly take a backup of the router enabling us to restore your router quickly in the event of a failure.

Monitoring – we monitor your router and will be made aware of any issues or faults on the router or with your internet connection immediately by email.

Diagnostics – we carry out any diagnostics remotely. In the event you have an issue, we automatically subscribe your router to the DrayTek Vigor ACS service, and everything will be monitored and managed from our ACS dashboard.

* By not subscribing, you accept that the support provided will be chargeable at our applicable hourly rates and any replacement equipment and setup and delivery costs will also not be covered. Your router will also not benefit from remote firmware updates and security patches.

** DrayTek router management and support charge does not cover any engineer site visits, these are charged in addition. If we replace a router whilst attending your site, the hardware is not charged as it's covered under the agreement.

**For all further enquiries,
get in touch.**
